

## 90 Litre Heavy Duty Dustbin

Waste storage may need added durability and strength

### Features

- Can be used indoors and outdoors as weather resistant.
- Made from polypropylene for added durability and strength.
- Polypropylene is a thermoplastic polymer that does not absorb water to the same degree as some other plastics.
- Unlikely to form mould or deteriorate owing to the presence of bacteria or other elements.
- Very durable and in order for it to break, a significant level of damage will have to be done.

### Specifications

- 54cm diameter base.
- 64cm high (or 68cm clearance over handle).
- Carrying capacity of 90 litres.
- Clearance width over handle is 67cm.
