Standard Debris Netting - Specification Sheet

Description

Mudfords Debris Netting is a durable, lightweight, and UV-stabilized mesh designed for construction sites, scaffolding, and safety barriers. Made from high-density polyethylene (HDPE), it effectively contains debris, enhances worker safety, and provides wind and dust control. Its reinforced edges and tear-resistant material ensure long-lasting performance in various weather conditions. Ideal for commercial and residential projects, this netting is easy to install and available in multiple sizes and colours.
