

ALUMINIUM CONCRETE PLACER

DUTI Code: 24900841

DESCRIPTION & APPLICATION

The DUTI Aluminium Placer is a contractor-grade tool designed for efficient handling, spreading, and levelling of concrete. Built with lightweight yet durable materials, it provides contractors with a reliable solution for achieving smooth, consistent concrete placement on site.

FEATURES & BENEFITS

- **High-Quality Aluminium Blade** – Lightweight and resistant to corrosion, ensuring long-lasting performance in demanding site conditions.
- **Functional Design** – Wide head and smooth edges allow for accurate concrete spreading and levelling.
- **Ease of Use** – Lightweight aluminium design makes it easy to manoeuvre, reducing strain on operators.
- **Durability on Site** – Built to withstand tough job site conditions, resisting bending, warping, and corrosion.

IDEAL APPLICATIONS

- Commercial and industrial concrete pours
- Slab preparation and finishing
- Large-scale construction projects requiring consistent surface quality

Handle Colour	Blue (powder coated)
Head Colour	Original aluminium
Handle & Head Material	aluminium
Overall Length	1537mm
Head Dimensions	500mm x 100mm
Head Thickness	2.9mm
Head Support Rod Diameter	10mm
Handle Diameter	30mm
Weight	1,082g (+/-10g)
