

Hardwood Waxed Handle Filling Knife

Product Sheet

Product Overview

The VJT Hardwood Handle Filling Knife range (commonly referred to as putty knives or filler knives) comprises sturdy, flexible hand tools designed for professional construction, decorating, and woodworking tasks. These knives are engineered to spread, smooth, and apply various filler materials; such as joint compound, wood filler, plaster, and putty with precision.

Each knife combines a flexible stainless steel blade with a hardwood handle secured with rivets for reliable grip and long-lasting performance on demanding jobsites.

Available in a range of blade widths to suit different applications, these knives provide controlled filler application and smooth finishing with long-lasting durability.

Applications

- Filling and smoothing holes, cracks, dents, and blemishes in wood, plaster, drywall, masonry, and plasterboard.
- Applying joint compound, wood filler, putty, and other repair materials for seamless surface finishes prior to sanding and painting.
- Drywall taping, finishing, and patching; smoothing and levelling compound over seams and joints.
- Fine surface refinements and repairs on furniture, trims, door frames, and cabinetry projects.

Features

- Hardwood handle with steel rivets for durability and secure handling
- Full stainless steel flexible blade for strength, corrosion resistance, and long service life
- Multiple blade widths available for different filling requirements
- Balanced weight and grip for controlled scraping and improved comfort during extended use

Product Code & Blade Size Table
