European Technical Assessment

ETA 19/0402 of 04/03/2026

(English language translation, the original version in Czech language)

General Part

Technical Assessment Body issuing the European Technical Assessment:
 Technical and Test Institute for Construction Prague

Trade name of the construction product

Chemofast Injection System VECO
 VECO Blue
 VECO Express
 VECO Tropical

Product family to which the construction product belongs

Bonded fasteners for use in concrete

Manufacturer

Chemofast Anchoring GmbH
 Hanns-Martin-Schleyer-Str. 23
 47877 Willich
 Germany

Manufacturing plant

Chemofast Anchoring GmbH

This European Technical Assessment contains

26 pages including 23 Annexes which form an integral part of this assessment.

This European Technical Assessment is issued in accordance with Article 95(4) of Regulation (EU) 2024/3110, on the basis of

EAD 330499-02-0601
 Bonded fasteners and bonded expansion fasteners for use in concrete

This version replaces

ETA 19/0402 issued on 20/11/2024

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full (excepted the confidential Annex(es) referred to above). However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

Specific parts

1. Technical description of the product

The Chemofast Injection System VECO, VECO Blue, VECO Express, VECO Tropical for cracked and uncracked concrete is a bonded anchor consisting of a cartridge with injection mortar and a steel element. The steel elements consists of a commercial threaded rods with a hexagon nut and a washer or reinforcing bar.

The steel element is placed into a drilled hole filled with injection mortar and is anchored via the bond between metal part, injection mortar and concrete.

The illustration and the description of the product are given in Annex A.

2. Specification of the intended use in accordance with the applicable European Assessment Document (hereinafter EAD)

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed working life of the anchor of 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the products in relation to the expected economically reasonable working life of the works.

3. Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance to tension load (static and quasi-static loading)	Annex C 1, C 2, C 3, C 5
Characteristic resistance to shear load (static and quasi-static loading)	Annex C 1, C 4, C 6
Displacements under short term and long term loading	Annex C 7, C 8
Durability	Annex B 1
Characteristic resistance and displacements for seismic performance categories C1 and C2	Annex C 9, C 10, C 11

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Satisfy the requirements for performance class A1
Resistance to fire	NPA

3.3 Hygiene, health and environment (BWR 3)

No performance determined.

4. Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base

According to the Decision 96/582/EC of the European Commission the system of assessment verification of constancy of performance (see Annex IX to Regulation (EU) 2024/3110) is system 1.

5. Technical details necessary for the implementation of the AVCP system, as provided in the applicable EAD

The factory production control shall be in accordance with the control plan which is a part of the technical documentation of this European Technical Assessment. The control plan is laid down in the context of the factory production control system operated by the manufacturer and deposited at Technical and Test Institute for Construction Prague. The results of factory production control shall be recorded and evaluated in accordance with the provisions of the control plan.

Issued in Prague on 04.03.2026

Table B4: Working and curing time VECO, VECO Blue¹⁾

Temperature in base material			Maximum working time	Minimum curing time
T			t_{work}	t_{cure}
- 5 °C	to	- 1 °C	90 min	6 h
+ 0 °C	to	+ 4 °C	45 min	3 h
+ 5 °C	to	+ 9 °C	25 min	2 h
+ 10 °C	to	+ 14 °C	20 min	100 min
+ 15 °C	to	+ 19 °C	15 min	80 min
+ 20 °C	to	+ 29 °C	6 min	45 min
+ 30 °C	to	+ 34 °C	4 min	25 min
+ 35 °C	to	+ 39 °C	2 min	20 min
Cartridge temperature			+5°C up to +40°C	

¹⁾ The VECO Blue injection mortar has a curing time proof by changing the color from blue to gray after curing minimum time. The curing time proof is only valid for the standard version of the mortar.

Table B5: Working and curing time VECO Express

Temperature in base material			Maximum working time	Minimum curing time
T			t_{work}	t_{cure}
- 10 °C	to	- 6 °C	60 min	4 h
- 5 °C	to	- 1 °C	45 min	2 h
+ 0 °C	to	+ 4 °C	25 min	80 min
+ 5 °C	to	+ 9 °C	10 min	45 min
+ 10 °C	to	+ 14 °C	4 min	25 min
+ 15 °C	to	+ 19 °C	3 min	20 min
+ 20 °C	to	+ 29 °C	2 min	15 min
Cartridge temperature			0°C up to +30°C	

Table B6: Working and curing time VECO Tropical

Temperature in base material			Maximum working time	Minimum curing time
T			t_{work}	t_{cure}
+ 10 °C	to	+ 14 °C	30 min	5 h
+ 15 °C	to	+ 19 °C	20 min	210 min
+ 20 °C	to	+ 29 °C	15 min	145 min
+ 30 °C	to	+ 34 °C	10 min	80 min
+ 35 °C	to	+ 39 °C	6 min	45 min
+ 40 °C	to	+ 44 °C	4 min	25 min
+45°C			2 min	20 min
Cartridge temperature			+5°C up to +45°C

Intended use
Working and curing time

Annex B 4

Installation instructions

Drilling of the bore hole

1. **Hammer drilling (HD) / Compressed air drilling (CD)**
 Drill a hole to the required embedment depth.
 Drill bit diameter according to Table B1 and B2.
 Aborted drill holes shall be filled with mortar.
 Proceed with Step 2 (MAC or CAC).

Manual Air Cleaning (MAC)

for drill hole diameter $d_0 \leq 20\text{mm}$ and drill hole depth $h_0 \leq 10d_{\text{nom}}$ with drilling method HD/CD

- 2a. **Attention! Remove standing water in the borehole before cleaning.**
 Blow the bore hole clean minimum 4x from the bottom or back by hand pump (Annex B 3).

- 2b. Attach brush RBT according to Table B3 to a drilling machine or a cordless screwdriver. Brush the bore hole minimum 4x over the entire embedment depth in a twisting motion (if necessary, use a brush extension).

- 2c. Finally blow the bore hole clean minimum 4x from the bottom or back by hand pump (Annex B 3).

Compressed Air Cleaning (CAC):

All diameter with drilling method HD/CD

- Attention! Standing water in the bore hole must be removed before cleaning.**
 2a. Blow the bore hole clean minimum 4x with compressed air (min. 6 bar) (Annex B 3) over the entire embedment depth until return air stream is free of noticeable dust. (If necessary, an extension shall be used.)

- 2b. Attach brush RBT according to Table B3 to a drilling machine or a cordless screwdriver. Brush the bore hole minimum 4x over the entire embedment depth in a twisting motion. (If necessary, a brush extension RBL shall be used.)

Chemofast Injection System VECO, VECO Blue, VECO Express, VECO Tropical for concrete

Intended use
 Installation instructions

Annex B 5

Installation instructions (continuation)

2c. Finally blow the bore hole clean minimum 4x with compressed air (min. 6 bar) (Annex B 3) over the entire embedment depth until return air stream is free of noticeable dust. (If necessary, an extension shall be used.)

Cleaned bore hole has to be protected against re-contamination in an appropriate way. If necessary, repeat cleaning process directly before dispensing the mortar. In-flowing water must not contaminate the bore hole again.

3. Screw on static-mixing nozzle SM-14W and load the cartridge into an appropriate dispensing tool. If necessary, cut off the foil tube clip before use. For every working interruption longer than the maximum working time t_{work} (Annex B 4) as well as for new cartridges, a new static-mixer shall be used.

4. Mark embedment depth on the anchor rod. The anchor rod shall be free of dirt, grease, oil or other foreign material.

5. Not proper mixed mortar is not sufficient for fastening. Dispense and discard mortar until an uniform grey or blue (VECO Blue) colour is shown (at least 3 full strokes; for foil tube cartridges min. 6 strokes).

6. Starting at bottom of the hole and fill the hole up to approximately 2/3 with adhesive (If necessary, a mixer nozzle extension shall be used.) Slowly withdraw of the static mixing nozzle avoid creating air pockets. Observe the temperature related working time t_{work} (Annex B 4).

7. Insert the anchor rod while turning slightly up to the embedment mark.

Chemofast Injection System VECO, VECO Blue, VECO Express, VECO Tropical for concrete

Intended use
Installation instructions (continuation)

Annex B 6

Installation instructions (continuation)

8. Annular gap between anchor rod and base material must be completely filled with mortar. In case of push through installation the annular gap in the fixture must be filled with mortar also. Otherwise, the installation must be repeated starting from step 6 before the maximum working time t_{work} has expired.

9. Temperature related curing time t_{cure} (Annex B 4) must be observed. Do not move or load the fastener during curing time.

10. Install the fixture by using a calibrated torque wrench. Observe maximum installation torque (Table B1). In case of static requirements (e.g. seismic), fill the annular gap in the fixture with mortar (Annex A 2). Therefore, replace the washer by the filling washer VFS and use the mixer reduction nozzle MR.
