H02039P PHONE GRIPPER WITH COIL TETHER

0.3 KG 0.6 LB

MAX LOAD

The GRIPPS® Phone Gripper with Coil Tether is a purpose-built mobile phone tethering system for work at height. The Phone Gripper uses a custom silicon compound to deliver a high-strength grip without the need for permanent connector points or additional adhesives.

An integrated tether eyelet connects directly to the included Coil Hard Hat Tether (H01075), helping to protect the device in the event of a drop. The design preserves core functionality and is compatible with most smartphone models.

Note: Users should be aware that the gripper partially covers the touchscreen corners and may obscure parts of the camera on some devices.

ENGINEERED FOR DROP PREVENTION

KEY FEATURES

HOW TO USE

1

Pass cord through the eyelet of the Phone Gripper and weave it back through its own loop to create a choke-hold. Pull tight.

2

Pull all four corners of the Phone Gripper endings over the corners of your device to the front side. Ensure all corners are firmly applied and the Phone Gripper has a snug fit over device.

3

Apply the clip of the coil tether to your clothing by sliding the clip over the garment and snapping shut the clip. Ensure the clip is closed correctly by testing, firmly pull-on tether to check for a secure hold.
