## HOW TO USE

1

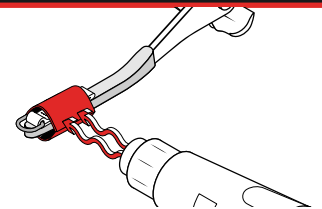

Place Tool Catch towards the base of nips/pliers handle, ensuring the Tool Catch D-Ring overlaps the nips/pliers ending.

2

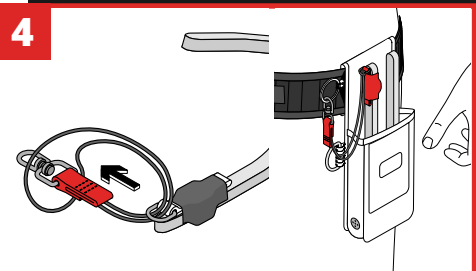

Wrap the tape around the tool 10x while stretching the tape to activate the self-vulcanising feature, creating a secure connection. Ensure raised 'catch' is not covered by the tape. Pull on Tool Catch with force to test application.

3

Slide GRIPP Shrink over Tool Catch and V-GRIPP Tape. Then apply heat gun over V-GRIPP Tape, covering all areas until fitted securely to Nips.

4

Apply the Swivel Catch, by passing it through the D-Ring and choking it back on itself. Pull tightly.
