00700060	Brown	1000	7.0	42	No. 10 - 14

## 0010 - Plasterboard Anchors

### Description

A self drilling anchor designed for fastening light to medium loads to plasterboard and other thin wall materials. To use in plasterboard, simply screw the anchor into the board using a screwdriver or power screwdriver. The point drills a pilot hole followed by a coarse, helical thread biting into the plasterboard making the fix. The screw supplied is then used to mount the fixture.

### Advantages

- A range of fixings for different applications
- Positive tightening of the anchor
- No need for pre-drilling
- Removable
- Driva Plus combines screw and clamp fixing
- Low profile head
- Head sits flush behind fixture
- Zinc alloy body
- Corrosion resistant

### Typical applications

- Bathroom accessories
- Fuse boxes
- Bracketry
- Signage
- Mirrors
- Dado Rails
- Radiators (Driva® Plus only)
