

DIAMOND BLADES

DPU/C

DPU/C UNIVERSAL CONCRETE

DESCRIPTION : High performance laser welded blade with a 30-degree in-line gullet design to clear debris faster and improve life. Fast cutting with market leading product life. (450/500mm has 10mm segments)

USE ME FOR : Indian stone / Granite / Clay products / Class A Engineering bricks
All reinforced concrete types / Concrete kerbs, beams, lintels & flags
Bricks / Occasional use in Asphalt & small metal sections

13MM SEGMENT HEIGHT

30° GULLET / CONICAL SEGMENTED

CORE PROTECTION

VENTILATED CORE

LASER WELDED

CONICAL SEGMENTS

Conical segments will lower vibration thanks to the consistent gap between the segments. There will be an increase in product life thanks to the greater size of the segment and a decrease in noise due to there being less air distortion in motion.

30 DEGREE GULLETS

In line, 30 degree gullets help clear debris faster and they improve life as a result.

COOLING HOLES

Cooling holes in a blade as the description says, will keep the steel core cool and will prevent distortion of that core. Keeping the diamond matrix cool in segments will improve speed and life.
