

1950 - Putty Pads

Description

VJT Putty Pads are supplied in a roll form, which have been designed for use with electrical outlet boxes. VJT Putty Pads improve both Acoustic and Fire Resistive performance in dry wall applications. They are suitable for use in both commercial and residential applications, having been designed to fit most typical drywall socket boxes and are easy to install in a 'cut-to-size' format. They have an acoustic rating of up to 69dB and have been tested to BS476: Part 20: 1987 to give at least two hour fire resistance integrity and insulation.

Putty Pad Roll

VJT Code	Description	Reel Size (mm)	Fire Rating	Acoustic Rating	Coverage (Per Reel)	Pack Qty
